

Maximising our Potential

2nd November 2023

Dear Parent/Carer

We're working with Weduc, our communications software provider, helping them test new functionality within our school app, which will help parents by translating school messages into different languages.

The test will run until April 2024 and during this time a new button will appear within your school app, which you can use to translate messages. It's very easy to use and attached is an overview guide which will explain more.

After the test period, Weduc has also asked us to circulate a short survey to parents asking for their views and feedback on the functionality.

Please note, the language translation facility will only be available during the test period and depending on how the trial goes may not be available in the future.

On behalf of Weduc, thank you for your help with this, we hope you find the new functionality useful.

Kind Regards
School Office
