

Maximising potential using Knowledge Organisers

What are Knowledge Organisers?

A document where all of the **core knowledge** your child needs for this term is organised. Your child has been given a Knowledge Organiser Booklet with all of the knowledge they need to know in every subject for this term

How can I help my child maximise their potential with their knowledge organisers?

You can: Use the knowledge organisers to **quiz your child**.

This helps because: The more often we try to remember core knowledge, the easier it becomes!

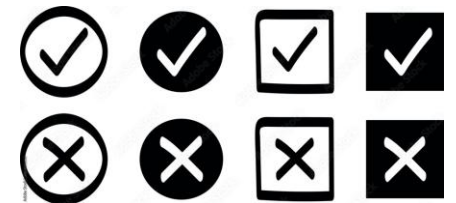

You can: Encourage your child to **map out** their **knowledge** on a mindmap

This helps because: Mapping boosts learning by encouraging your child to select key information and categorise/organise it

How is your child using the knowledge organisers in form time?

During Reflective Friday/Thoughtful Thursday students will use a **targeted revision strategy** to help them remember core knowledge from their knowledge organiser. The following week they will be **quizzed** on the topic they have revised
